

# MORE THAN MEASUREMENT...

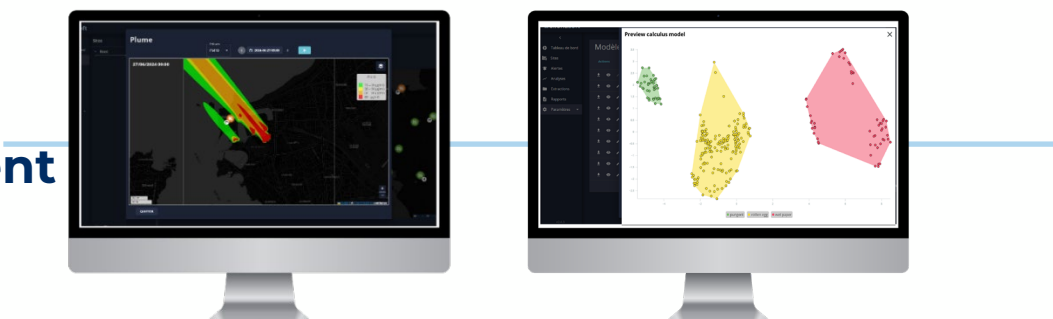

## Data Monitoring

- Implementation of Ellona IoT sensors for **continuous measurement**
- Access **real-time** data visualization and **automated alerts**

## Data Management

Streamline **data collection, storage, and management**

Gases

Particles

Odor

Noise

Humidity

Atmospheric pressure

Temperature

VOC

Control > Identification > Alert > Regulation > Remediation

# ... IDENTIFICATION & REMEDIATION

- Corrective and preventive decisions
- Provide meaningful data to third-party applications

## A one-of-a-kind approach for your operations

1. **Real-time multi-variate analysis:** Advanced environmental intelligence platform for precise insights.
2. **Frequent updates:** Data refreshed every 10 seconds for continuous analysis.
3. **Accurate source identification:** Advanced algorithms for precise footprint detection.
4. **Smart alerts and customized notifications:** Real-time alerts tailored to your specific needs.
5. **Automatic triggering of remediation systems:** Instant implementation of corrective solutions in response to anomalies.
